# Australia & New Zealand

Gone are the days of a simple Swedish massage from a therapist wearing white. The spa industry has bloomed in the past decade with massage menus featuring hot stones, chakra aligning, ayurvedic oil streaming, deep tissue, shiatsu and Hawaiian lomi lomi. Add facials and body treatments using products containing essential oils, oxygen and even crushed diamonds and the spa competition begins to heat up.

Story by Rachael Oakes - Ash

The buzzwords for spas in 2006 are residential, wellness, medico, cuisine and eco. Think spas you can overnight in and multi-day programs designed to treat all aspects of your health from physical to mental to emotional.

Traditionally Asia has been the spa mecca but Australia and New Zealand are making their own mark. Indigenous products and spiritual experience are big business down under with Endota Spas, Daintree Eco Lodge and Lilianfels all utilising Aboriginal and native treatments into their spa menus. For New Zealand, it's all about the setting. Kiwi spas utilise the jaw-dropping beauty of the Remarkable Ranges in the South Island and the rolling vineyards of New Zealand wine country.
